

What We Do

Perdaman Electrical Services (PES) is a market-leading provider of Electrical and Communications services in Western Australia.

Situated in Perth and operating throughout Western Australia, PES works with Perdaman Advanced Energy to provide multiple sectors with a wide variety of turn-key solutions for data, communications, and high and low voltage electrical services.

No matter the size or complexity of your project, whether you require system design, installation or maintenance, our accomplished team will deliver results on time, within budget and in compliance with the highest levels of electrical standards and safety.

Our Difference

Perdaman Electrical Services is part of the Perdaman Trinity of Power, an integrated service offering solar, electrical retailing and electrical design and installation.

Partnering with Perdaman Advanced Energy and Perdaman Energy, Perdaman Electrical Services is currently the only market provider who can design a fully comprehensive energy and electricity solution for your business, inclusive of end-to-end supply and installation.

Perdaman Electrical Services works to build long-term relationships with partners and customers to constantly improve the quality of our service.

We stand at the forefront of technology to create a better tomorrow by delivering excellence today.
